Individual print on the reflector or own model

An individual print on the reflector or own model. With our silk screen printing, it is possible to print nearly anything at all – a logo, a trade mark, company's name, etc. – monochrome or multicoloured. Printing is performed on the reflector's surface for the prismatic reflectors, and under the reflecting film for the soft and slap wrap reflectors. In spite of a wide choice of reflectors, some clients decide to have their own reflector shape. Our sound experience and competence in reflector manufacturing ensure that the reflectors tailored for clients will be high-quality products meeting the safety requirements. When choosing own print or own reflector shape, the reflector will become individual.
